**DETAILED ACTION**

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

- (i) Species I: Distinction of  $R_{sr}$  (melatonin suppressive radiation) drawn to Claim(s) 14-16.
- (ii) Species II: Fig. 1, distinction of proportion C (mass/area dimensions) drawn to independent Claim(s) 19-20.
- (iii) Species III: Fig. 3, distinction of  $P_{Hg}$  (mercury pressure) drawn to Claim(s) 21-22.

The species are independent or distinct because each species represents separate and distinct inventions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is **no** generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 2879

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
